Describe:

ERTS received a notification of a leaking tanker of HCL(UN1789 Class 8) located at the intersection of 35th and Wentworth near the Southbound lane of I-94 in Chicago, IL. Per the FD on site, the 35th St. roadway is shut down as a result of the released hazardous material. An estimated 305 gallons of material has been released to the asphalt surface with no storm drains, surface waterways, or soils impacted at this time. It was reported that the tank is leaking from the sump onto the asphalt at this time.

2500 gallons of product was transferred. 17 yards of neutralized released material was solidified and collected into a 20 yard roll-off box and transported off location for pending disposal.
