Estimate the duration of the release, if possible. Describe what was done to mitigate the effects of the release. Continue on additional sheets if necessary.

Describe:

According to the information obtained, the following occurred. While making a delivery the tank was overfilled resulting in the release of approximately 150 gallons of diesel fuel. The release impacted the containment area that had water inside. First Call Environmental(FCE) was dispatched to perform the cleanup. FCE removed the liquid from the containment. Once all of the liquid was removed, FCE rinsed the containment area. FCE transported the waste off site for disposal.

PART VII - RECOMMENDATIONS/ACTIONS TAKEN TO PREVENT RECURRENCE

Provide recommendations for improvement to hazardous materials transportation beyond the control of your individual company. Continue on additional sheets if necessary.
