A Quality Distribution tractor-tanker suffered a leak from the frangible disc during transportation. Approximately 20 gallons of material was released onto the soils and storm drain/drainage ditch alongside the roadway. React Environmental responded to the site for cleanup and remediation of the area. The leak was plugged and the tanker went an additional 5 miles to its final destination for offloading under the supervision of DEQ and React personnel. The impacted area was neutralized and all waste was containerized for transportation and disposal.
