Describe:

The first preventative measure for this particular accident is better route planning. Going forward this route will not be approved for our drivers. After the accident we were informed by the SChP that this particular road was not CMV friendly and that they continue to have numerous CMV accidents as result. More in depth training is also needed to better enforce our existing policy, to include defensive driving, rollover prevention and avoiding' distracted/drowsy driving. With these measures our drivers will be better trained to handle certain driving conditions and will be able to understand what to do to minimize/reduce the possibilities of serious crashes.
