Describe:

US Xpress contacted ERTS to dispatch a contractor to cleanup a leaking tote from an apparent hard braking incident that resulted in a 250 gallon tote being punctured. Local authorities evacuated the truckstop and secured the release and the trailer. The contractor unloaded the cargo, transferred the remaining material into drums. They then neutralized the spilled material, applied absorbents to the impacted areas and swept the areas clean. The empty tote was sent along with the drums back to the shipper for reclamation/disposition. The drums of spill cleanup debris are pending disposal.

- Where you are able to do so, suggest or describe changes (such as additional training, use of better packaging, or improved operating procedures) to help prevent recurrence.
