Driver setting up to pull sample. When he pulled the cap off product started to flow. Both the internal valve and external valve was open. He immediately closed the internal valve. Driver failed to check to make sure all the valves were closed before pulling the cap off. I spoke with the unloader, Dan'l Bruner, he said he's estimating 100-150 gallons spilled. Spill was contained and drained to their "wet well" that is pumped to a waste water treatment plant.
