Describe:

On 08/01/2025, at 0842, an FRA Hazmat Inspector observed TCIX 165040, a loaded tank car of Sodium Hydroxide Solution, leaking from the bottom of the package. The car was isolated and the shipper of record, Shintech Louisiana LLC, were notified via CHEMTREC report number 2025-0801-00083. Hepaco, a CSXT emergency response contractor, was dispatched to the scene and observed the bottom outlet valve (BOV) in the open position and a loose secondary closure cap. CSX Hazmat directed contactor personnel to close the BOV and secure the secondary closure cap tool-tight stopping the leak. All actions were communicated to the shipper (Shintech) Patrick Hill, 225-328-6281. The car was placed on hold and the FRA directed the shipper to apply for an OTMA-1 for the car's movement for offloading, then to Home Shop. NAR Code 148 RAR 226394 /
