PART VI - DESCRIPTION OF EVENTS & PACKAGE FAILURE

- Describe the sequence of events that led to the incident and the actions taken at the time it was discovered. Describe the package failure, including the size and location of holes, cracks, etc. Photographs and diagrams should be submitted if needed for clarification. Estimate the duration of the release, if possible. Describe what was done to mitigate the effects of the release. Continue on additional sheets if necessary.

Describe:

Tank car CGTX 31178 was found in the West Colton Yard in Bloomington, CA with diesel down the sides of the tank car and between the manway and the combination housing. After assessment it was determined that the manway swing bolts were over tightened causing the manway to be misaligned, also, the safety eye bolt was offset/bowed from being over torqued causing product to release. The manway gasket was inspected, and no issues were found. The tank car manway was reset, and the swing bolts were secured properly. Contractor cleaned off all diesel impacted areas on the tank car.

PART VII - RECOMMENDATIONS/ACTIONS TAKEN TO PREVENT RECURRENCE

- Where you are able to do so, suggest or describe changes (such as additional training, use of better packaging, or improved operating procedures) to help prevent recurrence. Provide recommendations for improvement to hazardous materials transportation beyond the control of your individual company. Continue on additional sheets if necessary.

Describe:

Spoke with shipper about proper securement procedures.
