| - Transfer at sort center/cargo facility |  |

## PART VI - DESCRIPTION OF EVENTS & PACKAGE FAILURE

- Describe the sequence of events that led to the incident and the actions taken at the time it was discovered. Describe the package failure, including the size and location of holes, cracks, etc. Photographs and diagrams should be submitted if needed for clarification. Estimate the duration of the release, if possible. Describe what was done to mitigate the effects of the release. Continue on additional sheets if necessary.

### Describe:

On October 15th 2024 between the hours of 13:00 and 14:00 the driver loaded 7,500 gallons of clear diesel fuel into truck number 60, trailer number 139 at the Kinder Morgan fuel Terminal in North Augusta, SC. The driver left Kinder Morgan headed towards Columbia on I-20 and got off the interstate on exit 22 which is HWY #1. The driver traveled down #1 Hwy until he got to Chinquapin Road in Monetta and turned right. Chinquapin Rd turned into Two Notch Road which is in Leesville SC. The driver made a right turn onto Pond Branch and proceeded towards exit 44. The driver came over the bridge slowing down so that he would be able to make the turn. The driver stated he didn't feel like he was speeding making the turn, but he never looked at the speedometer. The driver made his turn, and the truck proceeded to lay over on its side. The Lexington County Fire Service responded to the scene. The rollover resulted in approximately 1500 gallons of ULSD being released on to the ground. The spilt fuel was recovered/remediated by Republic Services. The remaining product was pumped from the rolled over trailer to a trailer brought on scene by Barnes Oil & Propane Representatives.

## PART VII - RECOMMENDATIONS/ACTIONS TAKEN TO PREVENT RECURRENCE

- Where you are able to do so, suggest or describe changes (such as additional training, use of better packaging, or improved operating procedures) to help prevent recurrence. Provide recommendations for improvement to hazardous materials transportation beyond the control of your individual company. Continue on additional sheets if necessary.

### Describe:

All CDL drivers will immediately be retrained in Cargo Tank Rollover prevention techniques and the effects of liquid sloshing.
